

US BDII Requirements from Atlas

Application	Data from BDII	Requirement
SAM Test	Site resource data from LCG BDII	Regular sync with LCG BDII
FTS	Site resource data from LCG BDII	Regular sync with LCG BDII
PanDA	Site resource data from LCG BDII	Regular sync with LCG BDII
Individual users using the DQ2 Client via lcg-utils. Note: The new US Atlas T3s are all anticipated to use the wlcg-client maintained by US Atlas. This client is directed at the GOC BDII.	Individual users pull site resource data from either LCG or GOC BDII.	Regular sync with LCG BDII + an unknown number of queries on the GOC BDII

Note: This list may not be exhaustive but is expected to be indicative of Atlas requirements.
